

Jon Swan
Save Forest Lake

Good Morning Committee Members:

Thank you for accepting my testimony in SUPPORT of LD1639. I do not reside in Maine, but in neighboring New Hampshire, where our state is also under assault by those who would seek to exploit our natural resources with the importation of out of state trash. I would urge your committee to listen to the people of your state, not the lobbyists of the solid waste industry.

Keep in mind, the intent of Maine's decision to make Juniper Ridge a state-owned facility was to halt the influx of out of state waste into your borders. LD1639 helps to close that loophole, for the betterment of the citizens of Maine. Please, support and pass LD1639.

Thank you,

Jon Swan
