

**STATE OF MAINE
ONE HUNDRED AND TWENTY-SEVENTH LEGISLATURE
FIRST REGULAR SESSION
JOURNAL OF THE SENATE**

In Senate Chamber
Thursday
June 4, 2015

Senate called to order by President Pro Tempore Garrett P. Mason of Androscoggin County.

Prayer by Reverend Ed Hatch, Palermo Christian Church.

REVEREND HATCH: According to the Christian faith the Apostle Paul wrote in Second Corinthians 5:15 that Christ died for all, that those who lived will no longer live for themselves but for Him who, for their sakes, died and was raised. Self-centeredness is a real issue in all of our lives. Self-centeredness is behind wars and marital discord. It's why we get upset when the person in front of us is going to slow, as well as being upset at the person who passes us, although we do have great glee when we meet them at the next light. Many people are looking at what you are doing today with great self-interest at the impact of your decisions on their lives. You are in a hard place. You have to deal with your own consciences. You have to represent your own constituents. You are tasked with doing what is good for the state of Maine and sometimes these ideals conflict with one another. Mixed into this is party loyalty, as well as your own ambition and goals. You have difficult decisions to make as your interests conflict with the interests of others. I'm grateful and humbled by the invitation to come and pray before you today. My great advisor and my person who has the greatest wisdom, my wife, said to me, "These people need prayer for wisdom." She has been following some of the things that you have been doing and the long hours that you have been working and the difficult decisions. She said, "I'm thankful that I'm not one of them." Today I come to pray with you and for you, for wisdom both on behalf of my wife and also on behalf of God, because we all really do need it. Let us bow for prayer.

Almighty God, we come before You today with grateful hearts. In many other places the differences and disagreements that coexist with the difficult decisions that this Body of people need to make would be met with power, violence, and suppression of descent. We are thankful that we can peacefully express our views with freedom and liberty. I pray for the men and women before us this morning. Though they are here, some may be also struggling with issues and problems, sadness and pain, stressors that demand their time and energies. I pray that if any have come here stressed that You may give them focus and perspective to do what needs to be done, that they would do it in a way that would honor You. I pray for the business that is before them. Their decisions this session will affect my family and me. Their ability to get things done will impact many people in our great state. Help them to focus on doing what is right and best. Help them to leave self-interests behind and to focus on doing what is good for the people in the state of Maine and may they be able to say at the end of this day that what they did was good for all of us. Give them wisdom and give them strength for today. I pray this in the name of my Lord and Savior, Jesus Christ. Amen.

Pledge of Allegiance led by Senator Thomas B. Saviello of Franklin County.

The Following Communication: H.C. 179

**STATE OF MAINE
OFFICE OF THE GOVERNOR
1 STATE HOUSE STATION
AUGUSTA, MAINE 04333-0001**

June 1, 2015

The 127th Legislature of the State of Maine
State House
Augusta, Maine

Dear Honorable Members of the 127th Legislature:

Under the authority vested in me by Article IV, Part Third, Section 2 of the Constitution of the State of Maine, I am hereby vetoing LD 556, "An Act To Require Public Schools To Offer Instruction Related to Cardiopulmonary Resuscitation and the Use of an Automated External Defibrillator."

As I wrote to the 125th Legislature regarding LD 1139 and to the 126th Legislature regarding LD 1366, CPR is an important, life-saving technique. I encourage all Maine citizens to undertake training so they are prepared in an emergency. Automated External Defibrillators have saved a number of lives over the years and should be at the ready during large public gatherings.

However, I regularly hear from community members who work and teach in our schools and from parents who serve on our school boards, pleading for relief from burdensome, unfunded mandates and the intrusion of Augusta into the classroom.

This bill is no exception. Supporters argue that all that is required for this training is a few deflated soccer balls, but they neglect the cost of our most valuable school resource: our teachers. Mandating that teaching time be diverted to implement a statewide program is costly to our schools and subverts the control of our local school boards.

If the Legislature truly believes this policy is necessary and requires a state law, the bill should be resubmitted with a reasonable estimate of total cost to our schools. Otherwise, I encourage them to work with each community rather than pass a new state law.

For these reasons, I return LD 556 unsigned and vetoed. I strongly urge the Legislature to sustain it.

Sincerely,

S/Paul R. LePage
Governor

READ and ORDERED PLACED ON FILE.

The accompanying Bill:

An Act To Require Public Schools To Offer Instruction Related to Cardiopulmonary Resuscitation and the Use of an Automated External Defibrillator

H.P. 380 L.D. 556

Comes from the House, 131 members having voted in the affirmative and 15 in the negative, the veto of the Governor was Overridden and it was the vote of the House that the Bill become law notwithstanding the objections of the Governor.

Senator **SAVIELLO** of Franklin requested and received leave of the Senate that members and staff be allowed to remove their jackets for the remainder of this Legislative Day.

The President Pro Tempore laid before the Senate the following: "Shall this Bill become law notwithstanding the objections of the Governor? In accordance with Article IV, Part Third, Section 2, of the Constitution, the vote will be taken by the Yeas and Nays. A vote of yes will be in favor of the Bill. A vote of no will be in favor of sustaining the veto of the Governor."

The Doorkeepers secured the Chamber.

The Secretary opened the vote.

ROLL CALL (#140)

Reports **READ**.

Senator **EDGEComb** of Aroostook moved the Senate **ACCEPT** the Minority **OUGHT NOT TO PASS** Report, in **NON-CONCURRENCE**.

On further motion by same Senator, supported by a Division of one-fifth of the members present and voting, a Roll Call was ordered.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Penobscot, Senator Dill.

Senator **DILL**: Thank you, Mr. President. Ladies and gentlemen of the Senate, I just thought I'd bring to the forefront what this bill does. It basically sets up a response team, or response group, to check into firewood problems with invasive insects. As many of you may know, sitting on our doorstep is both the Emerald Ash Bore and the Asian Longhorn Beetle. If these should get into the

state of Maine they would both be devastating insects. One of the major ways of getting in is through the possibility of coming in on firewood. If you look at other states that's handled the Asian Longhorn Beetle, the way of handling that is basically a scorched earth policy. That is it takes out any host trees within several square miles of where the infestation is found. This would be devastating if this got into our actual areas where we have Maples for maple syrup. I just urge everyone to follow my light and vote for the Ought to Pass. Thank you.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Aroostook, Senator Edgcomb.

Senator **EDGEComb**: Thank you, Mr. President. Ladies and gentlemen of the Senate, because the Maine Forestry Service already has authority to conduct the actions defined in the bill, the additional statutory authorities are unnecessary. Secondly, creating another formal structure will not provide any significant additional benefit to either the department's programs or to the forest resources. Thirdly, the various programs within the department already have non-lapsing dedicated accounts that could accept funds for specific projects. This response team could include folks that are already employed in the department, or employees from the department, such as forest rangers, foresters, entomologists, and these people will, I'm certain with they have a telephone or cellphone, make contact and the Commissioner will know about this almost immediately and even private foresters and other people even in the private sector that are aware of this will identify these two beetles that the good Senator had mentioned. I think the response team is really too little too late and we need to vote Ought Not to Pass on this unnecessary legislation.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Franklin, Senator Saviello.

Senator **SAVIELLO**: Thank you, Mr. President. Ladies and gentlemen of the Senate, I originally voted for this bill and changed my mind after reading Dave Strubles' testimony to the committee, which has been just mentioned by my good Chair. I would just say that he basically feels that he has the tools already in his hands. He did testify neither for nor against. He felt that he could take action if necessary. That's why I changed my vote and I will be voting in favor of the Ought Not to Pass. Thank you.

THE PRESIDENT PRO TEMPORE: The pending question before the Senate is the motion by the Senator from Aroostook, Senator Edgcomb to Accept the Minority Ought Not to Pass Report, in Non-Concurrence. A Roll Call has been ordered. Is the Senate ready for the question?

On motion by Senator **MILLETT** of Cumberland, supported by a Division of one-fifth of the members present and voting, a Roll Call was ordered.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Cumberland, Senator Millett.

Senator **MILLETT**: Thank you, Mr. President. I rise in opposition to the motion before the Chamber. We recently, the Education Committee, voted unanimously to remove the Smarter Balance testing as the Maine Education Assessment, the standardized test. We are now back to square zero as to what we're going to be using to measure student growth and performance. This is important because our teacher evaluation and performance laws require that we use a standardized test to be part of the teacher performance and evaluation system. The first year that is going to be required to utilize the standardized test will be the first year of a new test that we will be choosing in the next months. We don't know how that test is going to perform. It could be as much of a debacle as the Smarter Balance test has been. Yet, we are going to be, in current law, utilizing those results as the baseline for teacher assessment. I would say that this is not good public policy. This is unfair to our teachers. We should give at least one year to see how the test goes, allow for some tweaking if that's necessary, and then we will be in good shape to move forward. I ask that you vote against the motion before us. Thank you.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Hancock, Senator Langley.

Senator **LANGLEY**: Thank you, Mr. President. Sorry I was a little late on my light there. I would ask folks to support the Majority Ought Not to Pass Report. As we are working through this, this legislation is hinged onto other legislation. That is the Department of Education Rule, Chapter 180, which is the performance evaluation, professional growth systems. We enacted that and in that we have a pilot program in there that uses standardized test data. We just recently delayed that pilot program for a year. They need to have some data to work with in this pilot program and those pilot programs are really to run and to see how that data effects. In a pilot program, when you are done, you have the ability to change, modify, and then change course if you need to. This would allow us to keep working towards that. I don't see any real detrimental effects for being able to keep this in there. In fact, it will give good information and maybe cause for some reconstruction of those pilot programs going forward. It's just to kind of keep moving forward and let us do our work without pushing out or delaying even further. Thank you, Mr. President.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Cumberland, Senator Millett.

Senator **MILLETT**: Thank you, Mr. President. I just rise to respectfully disagree, that there actually are going to be consequences for our teachers. The data that will be utilized from the first year of the testing will be part of their assessment. It will be part of their evaluation, even though it is part of a pilot year of the evaluation systems, that data will be utilized in teacher evaluations. Thank you.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Androscoggin, Senator Brakey.

Senator **BRAKEY:** Thank you, Mr. President. I just want to speak to this very briefly because this is an issue that I have been, while I'm not on the Energy Committee, following for the last couple of years and am very passionate about. It seems like we often talk a lot in the Legislature about trying to expand opportunities in our state for clean, renewable energy, particularly energy that is affordable to the Maine people. Hydroelectric energy meets all those qualifications. It is clean. It is renewable. Most importantly, it is affordable. More hydroelectric energy in this state would help bring down the price of energy for Maine's people, who are struggling to heat their homes and keep the power on, especially with the long winters that we have here in our state. Unfortunately, there are certain barriers in the way to allow us to import more hydroelectric energy into the state. This bill, which would remove the 100 megawatt cap, would allow us to bring more hydroelectric energy into the state. I think for all those who would like to see greener, cleaner, affordable energy for the people of Maine, this is a commonsense step forward and I would hope that my colleagues will join me in supporting the Ought to Pass Report.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Lincoln, Senator Johnson.

Senator **JOHNSON:** Thank you, Mr. President. Ladies and gentlemen, we can buy power from Hydro-Quebec today. They wanted to sell it to us at a competitive market rate. What this bill is about is taking the renewable energy credits, that could be actually accomplishing some of what the Senator spoke of, encouraging renewable production in the state of Maine, and would apply that to any purchases from the already existing, already developed, already funded by the Canadian government, hydropower generated Hydro-Quebec. They would qualify for those rates of being applicable to purchase of electricity from them and, thereby, using rate payer money to pay a higher price to Canada for that power than what we could buy it for today. Makes no sense.

THE PRESIDENT PRO TEMPORE: The pending question before the Senate is the motion by the Senator from York, Senator Woodsome to Accept the Minority Ought to Pass as Amended by Committee Amendment "A" (H-270) Report, in Non-Concurrence. THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Cumberland, Senator Haskell.

Senator **HASKELL:** Thank you very much, Mr. President. Members of the Senate, I would like to encourage you to reject the pending motion of Ought Not to Pass so we could go on and put into place what would be an appropriate bill regarding government transparency and accountability. That's what this bill is all about. The State's management of a significant number of public dollars in our Health and Human Services program is comprehensive and is actually well coordinated. The department manages multiple programs which deliver services to citizens all across our state and these programs spend billions of dollars annually and the integrity of each of these programs must be maintained through efforts that are comprehensive, fair, and based on facts. The public has a right to know and understand what these are. Preventing and detecting fraudulent abuses and wasteful practices is an essential responsibility that we take very seriously here in the state of Maine and here in the Senate. One of the considerations here is what a failure to do really strong integrity-based programs does is put dollars at risk. This serves us all well when we do good integrity and good transparency regarding these programs. There is a requirement here. I won't go into the whole bill, but just understand that many of the fraud, waste, and abuse programs that are going on within the department, none of which are in and of themselves not doing the right thing, are imbedded within the individual programs. It's going to be important for us, as we go forward and as these programs get more complicated, to have a more centralized method of determining transparency, whether or not these programs are doing what they are supposed to be doing, and have reports back to the committee that are not from the individual sectors of the department which are managing the programs. I encourage you to take a look at what this bill actually does and make sure that we can provide the highest level of transparency and reporting on the issues regarding these programs. I urge you to vote no on the pending motion. Thank you, Mr. President.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Androscoggin, Senator Brakey.

Senator **BRAKEY:** Thank you, Mr. President. With respect to my colleague from Cumberland, I appreciate her earnest desire to have more information. That being said, as we reviewed this bill, those on the Minority Report, the Ought Not to Pass Report, this very much appeared to us to be a "make work" bill. How many reports do we need to receive? I'm sure many of us, through all of our committees, receive so many reports already and I know that we all work diligently to read each and every one of those reports that comes before us, especially with the workload that's before us. The truth is, when we have questions, and when there's information that we would like from the department, we can summon the department to come to address our committee

at any time to address particular topics. This bill would just create another report that has to be generated, man hours have to go into in order to send the report, and we hope that everyone will have an opportunity to read. Is it really worth the time and energy that goes into it when we can simply ask the department to come before our committee? I would really hope that this Body would follow my light and support the motion of Ought Not to Pass.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Cumberland, Senator Haskell.

Senator **HASKELL:** Thank you very much, Mr. President. Ladies and gentlemen of the Senate, while I appreciate the comments of my colleague from Androscoggin, I would tell you that what this type or style of reporting is designed to do is to get us away from the multiple individual, separate, and variable reports that come from individual departments and begin to coordinate and put those together in a readable form, one that can be compared from department to department and program to program so that we are able to see those things. I would respectfully disagree that this creates more reports. I believe that it creates a method by which we can consolidate and provide a report that might actually get read by the committee when it comes forward. Thank you.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Androscoggin, Senator Brakey.

Senator **BRAKEY:** Thank you, Mr. President. We, in this Body and in the hall of the Legislature and certainly in the Health and Human Services Committee, talk a lot about the cost of healthcare and in and around that conversation often times we talk a lot about, with healthcare costs going up, how we can accommodate that by shifting the cost around and making other people pay for it. Rarely, unfortunately, do we get to talk about actual proposals that would have an impact on actually bringing down the cost of healthcare and I'm pleased today that we have one such of those proposals here before us today which would have a real impact on lowering the cost of healthcare for the people of Maine. This bill, L.D. 734, "An Act to Repeal the Certificate of Need Requirement for Hospitals." I will note that the title is slightly off because it also includes nursing facilities. It would repeal the entire Certificate of Need requirement.

You might remember that we did have a similar bill to this earlier in this session, so I won't go into great detail about everything to do with the Certificate of Need, but I will just go over

some of the details to refresh people's memories. The Certificate of Need is a requirement that healthcare providers, in order to expand services so as to perhaps create a new hospital or to expand an existing hospital, must first receive permission from the State government and demonstrate that need for those services exists in the community. As you can imagine, this creates tremendous opportunity when new providers are attempting to enter a marketplace. This creates tremendous opportunity for existing providers to lobby the government to make sure that they don't have additional competition. After all, what business wouldn't? Who wants competition? As we know, competition helps create better environments for consumers and lowers the price while raising the quality.

The history of this, this policy originally came out in 1974 as a part of a federal policy on the National Health Planning Resource and Development Act. The thought process at the time was that one of the reasons that healthcare costs were high was because we had too much healthcare, we had too much investment in healthcare, and we had an over-supply of healthcare. The thinking was that if you restricted supply cost and price would go down. Of course, that is contrary to even the most basic economics 101 class, I know I took it in high school, where we learned that as supply goes up price goes down because competition brings down the price as people have to compete for their customers.

After that was passed in 1974, just twelve years later the federal government reversed itself. They looked at the trends and they saw that this did not do what it was intended to. It did not bring down the price of healthcare. In 1986 the federal government repealed this law. However, some states chose to keep it in place, including Maine. Here we are, all these years later, years later since it was repealed on the federal level, and we can compare and we can see states that kept the Certificate of Need and states that did not keep the Certificate of Need and we can see the difference in the cost of healthcare. The average healthcare cost per person in a state that does not have a Certificate of Need, does not have this barrier to entry and this restriction on new competition, is \$6,526. The average cost for healthcare per person in states with Certificate of Need is 11% higher, \$7,230. In Maine, our situation is even worse. We are 31% higher than states without a Certificate of Need. Our average cost per capita is \$8,521. That makes Maine the fourth most expensive state in the nation to purchase healthcare.

I would propose that if we were to move forward on this, repeal the Certificate of Need as many states have done, we will find that we will be taking a step forward to reduce costs for Maine patients.

I do want to talk a little bit just to bring in some other sources on this so you don't need to take my word for it. There was a report by the FTC and the Department of Justice as they looked into this policy. I just want to quote from that report. "Existing competitors have exploited the Certificate of Need process to thwart or delay new competition to protect their own supra-competitive revenues. Such behavior, commonly called "Rent Seeking," is a well-recognized consequence of certain regulatory interventions in the market. During our hearings we gathered evidence of the wide-spread recognition that existing competitors use the Certificate of Need process to forestall competitors from entering an incumbent's marketplace."

I won't spend much more time on this. I think I've laid out many of the facts that we would need to know to make a decision on this. I would just bring it back to this; we can look at the

numbers. States without a Certificate of Need, states without this government intervention that restricts competition, see healthcare prices that are lower than states with this restriction. We are the fourth most expensive state in the country for healthcare and I think it's about time that we do something that would actually bring down the price of healthcare for Maine people who are struggling to make ends meet. Thank you, Mr. President. I appreciate the time and I hope members of this Body will follow my light.

Off Record Remarks

On motion by Senator **HASKELL** of Cumberland, supported by a Division of one-fifth of the members present and voting, a Roll Call was ordered.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Cumberland, Senator Haskell.

Senator **HASKELL**: Thank you very much, Mr. President. Ladies and gentlemen of the Senate, many of the comments that my colleague from Androscoggin has made are accurate. However, this is not a free market. The entities that are under consideration here, the hospitals and the nursing homes, do not operate in free market conditions. I'm going to just briefly read a couple of pieces of testimony. I also want to refer to the Government Oversight Committee's report, which I don't have in front of me but which we referenced before, regarding the need to continue this Certificate of Need program. This is from the President and CEO of Maine Healthcare Association, Mr. Rick Erb, who is speaking here on behalf of nursing homes and PNMI's. "The empty nursing home beds don't serve the best interest of anybody in Maine's nursing home. They need to operate near capacity to stay in business and they also need to have a mix of private pay as well as government pay. If we open a free market, which could encourage nursing homes who only accept private pay to come in, we're going to find that our costs are going to go up and the number of nursing homes accepting Medicare and Medicaid are going to go down. That's going to create a problem for us." That is not the typical free market access problem that was being discussed by my colleague. In his discussion, he has also indicated to us, nothing that is of any great surprise, we've already got trouble funding the facilities, the nursing facilities, that we have now.

Maine has recently updated its Certificate of Need laws. It's been doing that continually since it went into place in 1978, I believe. We increased the threshold from \$1 million to \$5 million a few years ago, which is a major step which has really helped the current facilities to modernize.

From Eastern Maine Hospital Association, Lisa Harvey-McPherson was here to talk to us about how this impacts hospitals. She says in her testimony, "Over time various Legislatures have evaluated the CON and have implemented changes that increased the regulatory burden and then later relaxed the regulatory burden. The Certificate of Need program should exist to balance the investment of resources and the provision of care to Maine citizens." Again she repeats, "Healthcare is not a free market." "Maine's Certificate of Need

process," she goes on, "supports investment of resources for the critical healthcare needs of our community; maintaining a delicate balance of competition, quality, and volume of services." I'll go off her testimony here to just reiterate that much of this has to do with not simply competition but also access and volume of services, particularly in a rural state such as ours. She goes on to say, "In a predominantly rural state this balance is critical to maintain local access to essential healthcare, including primary care and emergency room service." In her final statement, "In the end the Certificate of Need provides a regulatory investment framework that reflects the realities of conducting the business of healthcare in a market dominated by government payers and a commitment to care and services, irrespective of ability to pay. We strongly urge you to oppose this legislation." This is from the hospitals.

I would encourage you to reject the current motion and reject losing our Certificate of Need program, which has evolved and has provided significant improvements because of the CON process where projects that have gone before them have been able to evolve, grow, and adjust to meet the needs of people in the state of Maine. Thank you, Mr. President.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Penobscot, Senator Gratwick.

Senator **GRATWICK**: Thank you very much, Mr. President. Ladies and gentlemen of the Senate, I, too, rise in opposition. I have been a practicing doctor here for 40 years. I have actually been here before the CON. The CON is by no means perfect, but it has worked to restrain prices as much as possible, I think, which I think we can do in this rural state. I would take exception to what the good Senator from Androscoggin had said before and reiterate what Senator Haskell said, which is to say that healthcare is not, indeed, a free market. This is not the usual economic model and I think that if you base your ideas upon that it's probably not correct. Second, I think it's important to realize that healthcare does not go by the usual rules. We can do a great deal more to restrain costs in Maine. I think this will have exactly the opposite effect. That has certainly been my experience, working on the inner parts of the Eastern Maine Medical Center as they've dealt with these issues over times. I would strongly urge that we not repeal this CON. Thank you, Mr. President.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Androscoggin, Senator Brakey.

Senator **BRAKEY**: Thank you, Mr. President. I apologize for rising a second time. I just wanted to note, very briefly, that many of the states that are without Certificate of Need requirements are, in fact, rural states and they have significantly lower costs per capita on healthcare than we do. Additionally, I would like to point out, and again highlight, that we are, in fact, the fourth most expensive state in the country for the cost of healthcare per person. That does not suggest to me that the system that we have now is currently working as well as some might suggest. Thank you very much.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Penobscot, Senator Gratwick.

Senator **GRATWICK**: Thank you very much, Mr. President. Again, I rise just very briefly to say we all learned in the tenth grade how to figure out which statistics we should have to punch up a particular point of view. It is an extraordinarily complicated area. You cannot summarize it into statistics. Thank you, Mr. President.

THE PRESIDENT PRO TEMPORE: The pending question before the Senate is the motion by the Senator from Androscoggin, Senator Brakey to Accept the Minority Ought to Pass as Amended Report. A Roll Call has been ordered. Is the Senate ready for the question?

An Act To Improve the Quality of Life of Persons with Serious Illnesses
S.P. 280 L.D. 782

On motion by Senator **LANGLEY** of Hancock, supported by a Division of one-fifth of the members present and voting, a Roll Call was ordered.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Hancock, Senator Langley.

Senator **LANGLEY:** Thank you, Mr. President. Women and men of the Senate, I rise before you today in support of L.D. 782, a simple but terribly important bill. Too many Mainers suffer from serious illness. We all know this because of the important health policy issues we deal with in this Chamber and because we all

likely know someone who has suffered from a serious illness. For too long our healthcare system has placed the focus on treating disease first and then the patient. Our healthcare system is starting to evolve where we are no longer treating people as the diseases they carry. We are treating people as whole people. This bill is about giving more Mainers access to care that addresses the patient's quality of life and puts the patient at the center of their care and in the driver's seat and making informed decisions about their care and support from their healthcare team and caregivers. This type of care is called palliative care. While many of you think of end of life care when you hear the words palliative care, it's important to know that this is a common misperception. End of life care is only one piece of palliative care. Palliative care is an important extra layer of support for patients of any age and at any stage of a serious disease. Palliative care is about ensuring that a patient has a high quality of life during treatment for disease. It's about team based care that works with the patient, the family, and the caregivers. It's about improved pain and symptom management and it's about understanding the patient's goals and explaining treatment options so the patients can choose what's best. It's something that can be life changing for patients that receive it, as it improves patient satisfaction and can extend life while also lowering care costs.

Mr. President, I first learned about palliative care during my wife's battle with breast cancer. Her care was superb and based on a team approach and lead by my wife, who saw her role as the leader of this team and me as her co-captain and servant. We believe that her recovery was in great respects due to this approach. During my wife's battle with breast cancer my niece's husband was diagnosed with Stage 4 colon cancer and ultimately passed at a young age of 32. His palliative care was excellent and the approach was patient centered. My niece will be forever grateful for the way he and she, as well as our family, were treated. Patient centered and lead care is vital to the success of our healthcare system.

Despite the growing availability and promise of palliative care, far too many patients still do not have access to it in Maine or nationwide. Some of these individuals shared their stories at the public hearing and there are many reasons for barriers to accessing palliative care, including lack of patient awareness; provider misconceptions; too few doctors, nurses, social workers, and other members of the care team trained in this specialty; as well as system issues. This bill brings together experts from Maine by the Maine Hospice Council to help identify barriers that exist in Maine and help identify ways to improve access to palliative care. This is commonsense approach to a critically important issue. As you can see by the letter distributed on your desk, a wide range of stakeholders, including organizations representing patients, elders, hospitals, doctors, nurses, social workers, and religious organizations, support the bill. L.D. 782 is about fundamentally addressing the patient's quality of life, whether it be for another 50 years or in their last five months. Please follow my light and support this important bill. Thank you, Mr. President.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Androscoggin, Senator Brakey.

Senator **BRAKEY:** Thank you, Mr. President. I can't say it better than Senator Langley did, so I will keep my comments very brief. I just want to say, as the Chairman for the Health and Human

Services Committee, this was a unanimous Ought to Pass Report. This is a wonderful bill. Palliative care enables our doctors and patients to consider not just length of life but also quality of life. For many people that's a very important balance to consider. Again, I cannot say it any better than my colleague just has, so I'll just say thank you for the opportunity to speak and I would encourage a ye vote on this motion. Thank you.

THE PRESIDENT PRO TEMPORE: The Chair recognizes the Senator from Cumberland, Senator Haskell.

Senator **HASKELL:** Thank you very much, Mr. President. Ladies and gentlemen of the Senate, I'll speak briefly to the matter of palliative care. I first, like many others, became knowledgeable about palliative care during hospice treatment for my husband who passed away. The palliative care was an important part of his care. That was then and this is now. What I came to realize and understand in the course of the public hearing was something that I hadn't realized and that's the evolution of palliative care into a growing and evolving medical specialty. There are specialists out there on palliative care now. They are integrated. They are going to continue to be integrated into our medical care practices at all levels. I think that, for me, was one of the more interesting and important parts of what I was listening to during the public hearing. As a medical specialty, this gives these individuals an opportunity to improve the patient's quality of life. Of the many things that they do, looking at the whole person beyond the disease is relief from symptoms, depressing, nutritional challenges, pain, stress, and all of those things which on the side of what the individual is dealing with while the doctor is dealing with what the disease is, while the medication is dealing with what the disease is. Palliative care professionals are dealing with what the patient is going through. This is an extraordinary, important, and, I think, of overwhelming value for people in this state, as we are an aging population and a few more of us now have all of those aches and pains that I have just talked about. When you add those on top of disease, to be able to have somebody working with you is extraordinarily important and I urge your support. Thank you.
