This trailer is necessary to support sea-run fish stocking operations in the St. Croix River during the period of fishway construction at the Woodland Dam. The trailer will enable safe and efficient transport of live fish between hatchery facilities or in-river capture locations and stocking locations throughout the watershed above the two dams, ensuring continuity of restoration and management activities for alewife and other diadromous species. Funding is no longer required in Professional Services and the All Other line category will have sufficient resources to meet obligations for the remainder of the fiscal year. Failure to allot these funds will result in the inability to comply with the program objectives and interagency commitments.
