*lobster plate 3*

**Statement of Fact**

This financial order allots a portion of the unencumbered balance forward to fund contracted research and education to support the development of the lobster industry. The ocean ecosystem is changing in response to factors, such as warming water temperatures, in ways that are not currently well understood. There is a need to identify how these changes could directly impact lobster biology, population dynamics and susceptibility to disease. Findings could provide information that would improve predictability for the fishery, in such ways as achieving a better understanding of the expected timing of molt, catch and volume of landings. Funding is received from lobster special registration plate fees. Failure to approve this financial order will have a detrimental impact on further development support for the lobster industry.
