Subject: RE: LD 412 Committee Requested Information

Good morning Avery,

In response to questions posed during the public hearing for my bill L.D. 412, I want to submit requested information to the Taxation Committee for the work session.

Senator Pouliot had inquired what the captured assessed value of the TIF was in the Town of Hollis. According to the Town Assessor, this figure is \$106,087,154. The value after the BETE is approximately \$62 million. The total taxable value of the Town is approximately \$531 million.

I will make myself available during the work session, when scheduled, to provide answers to any other questions, and members are free to direct additional questions to me at any time.

Thank you for your work on the Taxation Committee; I wish you well.

Sincerely,

Nathan M. Carlow
State Representative
