I would like Lamoine returned to 136, and let 135 include all Mount Desert Island towns and even some outer islands. Remove Mariaville, Waltham, and Fletchers landing from 136 and make 136 a coastal district around Frenchman Bay(FB). Extending up further north into the UT (up to T 10 would be ok too).

The senatorial district line in eastern Hancock County should go back to pre 2013.

he county commissioner districts in HC are warped. District 1 is bisected by district 3 in my town, but should be redrawn to have eastern, middle, and western districts. islands are ok ; mainland is difficult for proper governance.

Apportionment Commission,

I would like to have a time slot for a presentation.

Are there any map tools that a person could use to redraw maps on a hypothetical basis?

Meeting agenda # 5 'Draft Choice Preferences in Apportionment to Improve Understanding and Limit Confusion at Polling Place' May I have an explanation for this requirement?

What is the population of Presque Isle, Maine?

Sincerely,

Representative Joseph F. Underwood
